SUE DE FINISH

Suede finish offers a luxurious and tactile texture that mimics the feel of real suede. This type of laminate adds warmth and sophistication to any space, making it a popular choice for high-end residential and commercial applications. Its soft, velvety surface creates a welcoming ambiance and adds a unique touch to interior design. Suede finish laminate is durable and easy to maintain, making it a practical and stylish choice for myriad interior settings. Whether used in modern or traditional settings, suede finish adds a touch of elegance and charm to any environment.

Resistance to scratching	2N (Minimum)	✓
Resistance to staining	Not worse than 5	✓
Resistance to color change (Wool standard)	Not worse than 6	✓
-In xenon arc light	Not worse than 5	✓
-In enclosed carbon arc light		
Resistance to cigarette burns	Not worse than 3	✓
Resistance to steam	Not worse than 4	✓
Appearance	should be free from foreign particles	✓

Direction to use :

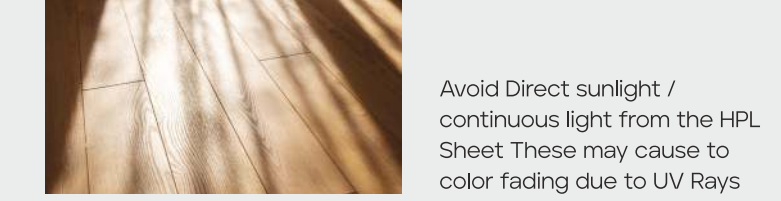

- Before using the laminate, ensure that the surface of plywood and laminate is clean, dry, leaved and free of oils, excess moisture or other contaminants, such as dust, synthetic particles, etc.
- Always stir the adhesive before use, sufficient adhesive must be applied on either or both the surfaces to be bonded. Do not add water to the adhesive as it makes the bond weak.
- Once the adhesive applied if tacky in nature (usually requires 5-10 Minutes, depending on the atmospheric conditions), the laminate should be placed on the surface, accurately aligned.
- Apply sufficient bonding pressure to ensure intimate contact necessary for an adequate bond over the entire area using as much pressure as possible without damaging the assembly. Pinch (Rotary press) and heavy weighted rollers are ideal. Hand rolling should be done from the centre to the edges to ensure the removal of all air bubbles. Roll the edges twice.
- For satisfactory bonding, keep the area under pressure for 12-18 hours (depending on atmospheric conditions). In rainy season or when humidity is too high, moisture may condense on the surface during drying (known as "Blushing") & will prevent an acceptable bond. Hot spray or forced air drying may be used to help prevent this condition.
- we recommend the maximum sheet size used for vertical field application be limited to 610x2440mm (2x8 Feet). If larger panels are required, fabricate them in the shop.
- When pasting laminate vertically, maintain uniform pressure on all sides until adhesive is dried. To avoid stress cracking, avoid making cut-outs having sharp & rough edges.
- Maintain a gap of 2mm between two Laminates while pasting side-by-side.

General Information :

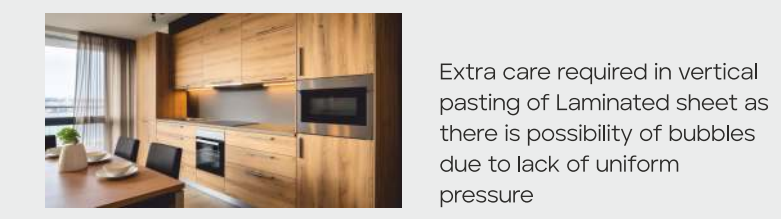

- Product Size** : High Pressure Decorative Laminated Sheets : 2440mm x 1220mm (8x4 Feet)
- Thickness** : 1mm (other thickness available on request)
- Quality Standard** : Design base paper are genuine imported Use of best quality kraft paper. Use of 100% melamine resin and 100% phenolic resin Use of best chemicals and raw material for better flexibility & durability
- Limited Warranty** : Mocco warrants that its products are reasonably free from manufacturing defects. The products when property used, will comply, with normal deviations, to related manufacturing specification. It excludes damage resulting from accidents, abuse or lack of care, improper use, or alterations We recommend doing a proper inspection of the product before installation and our liability is limited to the extent of the cost of the product only Mocco laminates are used for various applications, without possibility of control over the manufacturing of the finished product. The company does not assume obligations or abilities arising from the furnishing, sale, installation or repair, use or subsequent sale of any product, to any person or entity.
- Care & Maintenance** : Cleaning should be carried out with a soft moist cloth and warm solution. Do not use detergents containing abrasive particles or excess soda.
- Note** : (1) Samples presented are indicative of colour, pattern and surface finish but not of actual thickness. (2) Finishes other than shown here are available on request.

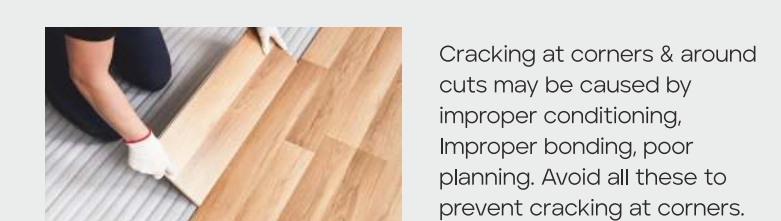

Do not use active acidic chemicals or sharp / wired brushes for cleaning the HPL Laminates surfaces

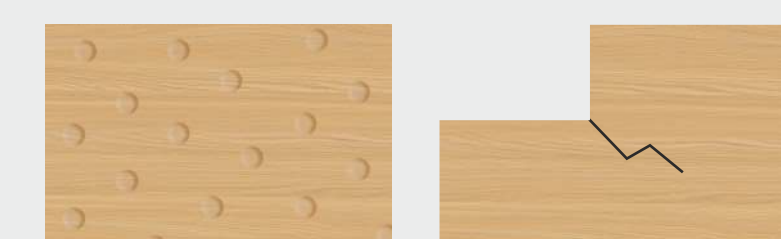

Avoid Direct sunlight / continuous light from the HPL Sheet These may cause to color fading due to UV Rays

Extra care required in vertical pasting of Laminated sheet as there is possibility of bubbles due to lack of uniform pressure

Cracking at corners & around cuts may be caused by improper conditioning, Improper bonding, poor planning. Avoid all these to prevent cracking at corners.

NO CLAIM WILL BE ENTERTAINED FOR AIR BUBBLES

NO CLAIM WILL BE ENTERTAINED FOR CRACKING ARISING OUR OF GROOVE CURRYING OR L SHAPE

MESMERIC Fervor
